*Power of the Witch* Laurie Cabot 2013-12-18 The earth, the moon, and the magical path to enlightenment. Written by a practicing witch who conducts classes and seminars on witchcraft—the oldest Western religion, a means of power and enlightenment, and a healing art. “Laurie Cabot has written a fascinating account of a beautiful and sadly misunderstood religion, witchcraft. She has with her life and work done a great deal to legitimize this ancient pagan form of worship. I am among the ecumenical Christians who have discovered the truth about witchcraft, that it is neither demonic nor evil. Power of the Witch is a marvelous introduction to the magical and highly ethical world of wicca.”—Whitley Strieber

*In Battle for Peace* William Edward Burghardt Du Bois 2014-02-20 W. E. B. Du Bois was a public intellectual, sociologist, and activist on behalf of the African American community. He profoundly shaped black political culture in the United States through his founding role in the NAACP, as well as
internationally through the Pan-African movement. Du Bois's sociological and historical research on African-American communities and culture broke ground in many areas, including the history of the post-Civil War Reconstruction period. Du Bois was also a prolific author of novels, autobiographical accounts, innumerable editorials and journalistic pieces, and several works of history. One of the most neglected and obscure books by W. E. B. Du Bois, In Battle for Peace frankly documents Du Bois's experiences following his attempts to mobilize Americans against the emerging conflict between the United States and the Soviet Union. A victim of McCarthyism, Du Bois endured a humiliating trial—he was later acquitted—and faced political persecution for over a decade. Part autobiography and part political statement, In Battle for Peace remains today a powerful analysis of race in America. With a series introduction by editor Henry Louis Gates, Jr., and an introduction by Manning Marable, this edition is essential for anyone interested in African American history.

Developing sustainable value chains for small-scale livestock producers
Food and Agriculture Organization of the United Nations 2019-08-16

This publication constitutes a practical development tool, which implements the sustainable food value chain framework with a focus on small-scale livestock producers, targeting an audience of project design teams and policymakers. Small-scale livestock producers are important actors in food production, human health and management of landscapes and animal genetic resources. However, they face a number of challenges, which hamper their productivity, access to market, and competitiveness vis-à-vis their larger counterparts. By integrating the concepts of value addition and the three dimensions of sustainability, the sustainable food value chain framework not only addresses questions concerning the competitiveness, inclusion and empowerment of small-scale producers, but also incorporates the cross-cutting issues that are increasingly embedded in development projects. These guidelines take the user through the different steps of value chain development, highlighting the particularities of the smallholder livestock sector, such as multi-functionality, specific production cycles or food safety issues, through concrete examples.

You Can Help Your Country
Berry Mayall 2014-05-20

Bringing in the harvest. Watching for enemy aircraft. Rescuing survivors from the wreckage of bombed houses. Keeping the family business running when parents were enlisted into war-work. These are just a few examples of how children and young people made substantial contributions to the war effort during the Second World War. You Can Help Your Country: English children's work during the Second World War reveals the remarkable, hidden history of children as social agents who actively participated in a national effort during a period of crisis. This highly-illustrated volume draws on interviews with people who were school-age during the war, on archives and on school histories which recorded wartime activities as well as children's accounts of their experiences at the time. Children expressed both positive and negative views of their work: exhilaration and exhaustion, pride and resentment, delight in new freedoms and anger at deprivation. Applying a sociological approach, the authors outline the social history of childhood during the first half of the twentieth century, documenting heated debates about the 'proper' activities of children and analysing the thinking that questioned class-based childhoods and schooling and promoted better health and better educational opportunities. In this context, they examine how children responded to appeals to 'do their bit' as urged through government poster campaigns, BBC radio broadcast programmes for schools, propaganda films and children's fiction. This is a stimulating, entertaining and scholarly contribution to the history of childhood, which will enable the reader to think about ideas of
childhood today and their rights, as citizens, to participate in the social and political life of their society. It will be essential reading for academics, researchers and students in the field of educational sociology and more widely, and will appeal to anyone with an interest in social history and war studies.

Life William K. Purves 2001 Authoritative, thorough, and engaging, Life:
The Science of Biology achieves an optimal balance of scholarship and
trainability, never losing sight of either the science or the student. The first
introductory text to present biological concepts through the research that
revealed them. Life covers the full range of topics with an integrated
experimental focus that flows naturally from the narrative. This approach
helps to bring the drama of classic and cutting-edge research to the classroom -
but always in the context of reinforcing core ideas and the innovative
scientific thinking behind them. Students will experience biology not just as a
litany of facts or a highlight reel of experiments, but as a rich, coherent
discipline.

The Saint Tade Adegbindin 2002
Investigating Classroom Interaction Kristiina Kumpulainen 2009 This book
adds a new perspective to existing research methodology literature on
analyzing social interactions in the classroom. Not only does this book
introduce multiple research methodologies for analyzing classroom
interactions but it also demonstrates these methodologies at work in different
empirical research studies. The authors of this book are all internationally well
recognized for their research work on the social life of classrooms, and now,
for the first time, they provide concrete accounts of the ways in which the theories and methodologies they have chosen to guide their research work function in action. These 'black boxes' or 'tacit knowledge' of conducting different types of analyses on classroom interaction have seldom been opened up in such a concrete way in the existing research literature. This book is an edited collection of papers introducing strands of research on classroom interaction whose logic of inquiry illuminate different approaches, analyses, and interpretations of social interactions and discourses in contemporary classroom settings. The methodological approaches discussed draw on studies of language and discourse, ethnography, as well as on sociological, psychological, and domain-specific analyses. In recognizing the complexity and challenges in mapping out the complex research territory focusing on classroom interactions, the prime goal of the book is to build a complimentary context for discussion of the ways in which different approaches to classroom interaction are realized and how they produce different analyses because of their purpose, conceptual framework, and methodological choice. The illumination of diverse approaches to classroom interaction and discourse is believed to demonstrate the potential and challenges each strand of research is likely to bring towards understanding the psychological, social and cultural life of the classroom and how these mediate the situated practice of teaching and learning in today's schooling. This book is targeted towards researchers and graduate students working within the field of social sciences, education and psychology. It also makes an excellent text for courses in research methodology, education, and related fields.
